ACCOMPLISHMENTS

ESF8 > Christus St. Elizabeth Hospital (L3), Beaumont, TX, was successfully evacuated yesterday due to a water system disruption. Baptist Hospital has requested 50,000 gal. of water. The chemical plume from Arkema is hindering access to Beaumont due to rerouting of traffic. Numerous DMAT teams and supporting resources deployed to the Houston AOR. To date, 165 total missions completed by the State and over 1,086 medical patients have been evacuated or transferred from multiple facilities.

ESF9 > CBP has rescued over 1,300 people between their FLEO, air and marine crews. Significant operations were conducted in Beaumont where 621 civilians were air evacuated from a local hospital to Dallas. Resource accountability has improved greatly, and span of control is effectively being maintained. US&R resources collaborated with air assets for improved mobility, particularly for purposes of situational information gathering. MO-TF1 worked in tandem with Houston Fire Department personnel to perform – and provide mentoring on – wide area search operations as part of the HFD's intent to transition to operations in Houston back to HFD. CO-TF1 delivered a baby.

ESF10 > EPA ASPECT aircraft was deployed this morning to provide real-time chemical information instantaneously to first responders. Aspect data received at approximately 1030 today indicate no measured contaminants in air over Arkema facility in Crosby, TX. The aircraft measures for 78 chemical compounds including peroxides and sulfur dioxides. EPA's federal On-scene Coordinator is now at the command post in Crosby to ensure all federal resources are available to first responders. EPA has also sent additional air monitoring personnel and equipment to augment the current effort of the state and local first responders. EPA monitoring teams from Houston area will be on-scene in the next few hours. Another Aspect flight is currently being deployed to the incident.

ESF13 > (DOJ/ATF)

The President has designated a Senior Federal Law Enforcement Officer (SFLEO) to the Disaster. His role is to oversee the response of all Federal Law Enforcement agencies assigned to the Disaster under FEMA Mission Assignments. In this case it is the Special Agent In Charge of the San Antonio Field Division. He has met with the highest level law enforcement officials in the state and in Houston inclusive of the Colonel of Texas DPS and the Houston Police Chief. This close relationship will continue throughout the Federal Law Enforcement Response. ESF#13 continues to operate in the same manner under the SFLEO.

LOOK AHEAD

ESF8 > Evacuations at healthcare facilities in the Houston area are slowing, and some healthcare facilities are beginning to re-open. Shelters have been established and general and medical population demand is expected to remain high. DMATs are seeing patients at Rosenberg, Dickinson High School, George Brown Convention Center, and supplementing care for BCFS (contract service with state) at NRG.

ESF9 > CBP will continue assessing most conducive and most threatened environments for continued riverine SAR rescue operations, including Conroe area in anticipation of a potential dam breach. As the operations intent from the State of Texas becomes clear, the plan will be for rehabilitation, rotation, and/or release of excess USAR resources as appropriate.

ESF10 > EPA is now flying the Aspect plane over the Arkema facility on regular intervals (approximately every 30 minutes). We have started to detect peroxide releases. We will keep Aspect in the area and continue to do flyover monitoring on the same schedule (or more often if needed) until the threat is over.

ESF13 >

ESF13 USDOJ-13 has over 800 Federal Law Enforcement Officers into the area of operation to provide protection for federal resources (ESF8 and ESF9) and staff as well as to provide direct federal assistance to the DDC via DPS STAR as directed. ESF13 will be bringing in more Federal Law Enforcement Teams from various agencies over the next several days to provide both Federal Operational Support and to provide direct Federal Assistance to Texas DPS DDC and to the Houston Police Department inclusive of Mobile Command Vehicles and Support Staff. High level officials today will continue to assess law enforcement needs. Multiple additional Quick Reaction Teams are inbound to check into the Disaster Area tomorrow and Saturday/Sunday/Monday to the ESF13 NRG Base Camp and to supplement and fill expectation of expanding mission requirements.

DoD

DoD continues to maintain the capabilities to conduct Air and Ground lifesaving, life sustaining, heavy and medium helicopter lifts and Incident Awareness and Assessment / Full Motion Video through the affected area.
